# EXPERIENCE THE DREAM OF FLIGHT

The first high performance windtunnel in Germany!

In Bottrop the highest Indoor windtunnel in Europe was build with a total height of 32m. The flightchamber is 4,3m wide and 17m high. It reaches a vertical airflow of 270km/h. Therefore the facility offers the possibility to train all artistic maneuvers of modern freeflying, reaching extremely high airspeed.

The new experience is available anytime for professionals as well as for beginners.

Even children from the age of 4 can experience the dream of flight with the guidance of an experienced instructor. It doesn't matter if large or small, if young or old – special previous knowledge or physical condition is not necessary for a flight in the windtunnel.

[www.INDOOR-SKYDIVING.de](http://www.INDOOR-SKYDIVING.de)

With snacks and beverages of our Flyersbar you can enjoy the view into our unique glass flightchamber and therefore observe the exceptional flightexperience.
